## Release Notes

## Release Notes

### Release History

Version	Date	Notes
1.0.1	6/2021	Incorrect bool to string value fix
1.0.0	11/2020	Initial Release

## Overview

Perform operations against the Resilient wiki: create or update pages, read wiki contents and perform lookups of content.

screenshot: [main](#)

### Key Features

\* Create or update a wiki page, including child pages \* Get the contents of a wiki page \* Lookup content in a specific page

## Installation

### Requirements

\* Resilient platform >= `v36.0.5634` \* An App Host or an Integration Server: \* To setup up an App Host see: [ibm.biz/res-app-host-setup](#) \* An Integration Server running `resilient_circuits>=30.0.0` on Python 3.6 (if using an Integration Server) \* To set up an Integration Server see: [ibm.biz/res-int-server-guide](#) \* If using an API key account, minimum required permissions are: | Name | Permissions | --- | ----- | | Org Data | Read | | Function | Read | \* Proxy supported: n/a.

### Install

- To install or uninstall an App using the App Host see [ibm.biz/res-install-app](#)

**\* To install or uninstall an Integration using the Integration Server see the [ibm.biz/res-install-int](#)**

### App Configuration

This app has no settings in app.config.

## Function - Wiki Get Contents

Return the contents of a wiki page based on the page's title or id. Optionally convert the results to JSON format (for string-encoded JSON data).

- Inputs:
- Outputs:
- Example Pre-Process Script:
- Example Post-Process Script:

## Function - Wiki Create or Update Page

Create or update a wiki page in Resilient based on the page's title or id. Optionally create a page as a child page.

- Inputs:
- Outputs:
- Example Pre-Process Script:
- Example Post-Process Script:

## Function - Wiki Lookup

Search a wiki page based on a search term and return the matching lines. The search term can be a regular expression (regex) for generalized lookup.

- Inputs:
- Outputs:
- Example Pre-Process Script:
- Example Post-Process Script:

## Rules

Use the example rules and workflows to understand how to use the inputs and parse the resulting content. Design your own rules and workflows based on your business requirements.

Rule Name	Object	Workflow Triggered
Example: Wiki Get Contents	incident	<code>example_wiki_get_contents</code>
Example: Wiki Create Page	incident	<code>example_wiki_create_page</code>
Example: Wiki Lookup	incident	<code>example_wiki_lookup</code>

## Troubleshooting & Support

If using the app with an App Host, see the Resilient System Administrator Guide and the App Host Deployment Guide for troubleshooting procedures. You can find these guides on the [IBM Knowledge Center](#), where you can select which version of the Resilient platform you are using.

If using the app with an integration server, see the [Integration Server Guide](#)

### For Support

This is a IBM Community Provided App. Please search the Community <https://ibm.biz/resilientcommunity> for assistance.
